About the Program

This Program is devoted to cultivating high-level, inter-disciplinary and application-oriented talents in the fields of politics, commercial trade, diplomacy, agriculture, science, education, literature, health, energy, transportation and public administration and providing intellectual support for the economic and social development in the aided countries.

The program mainly supports in-service government officials, academic researchers, and senior management personnel in related fields from the aided countries to pursue master's and doctoral degrees in English in China.
